

Drawing the future of the Catalan sewage surveillance program: towards an integrated public health perspective

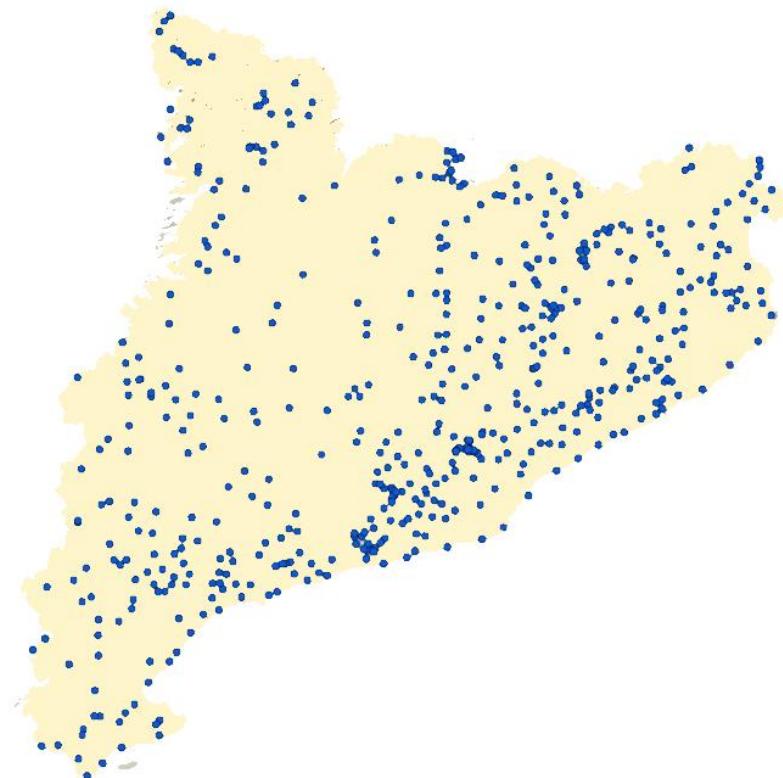

Laura Guerrero-Latorre
Environmental Health Service
Public Health Agency of Catalonia

17th November 2023, Frankfurt

Catalunya

7,56 Million inhabitants

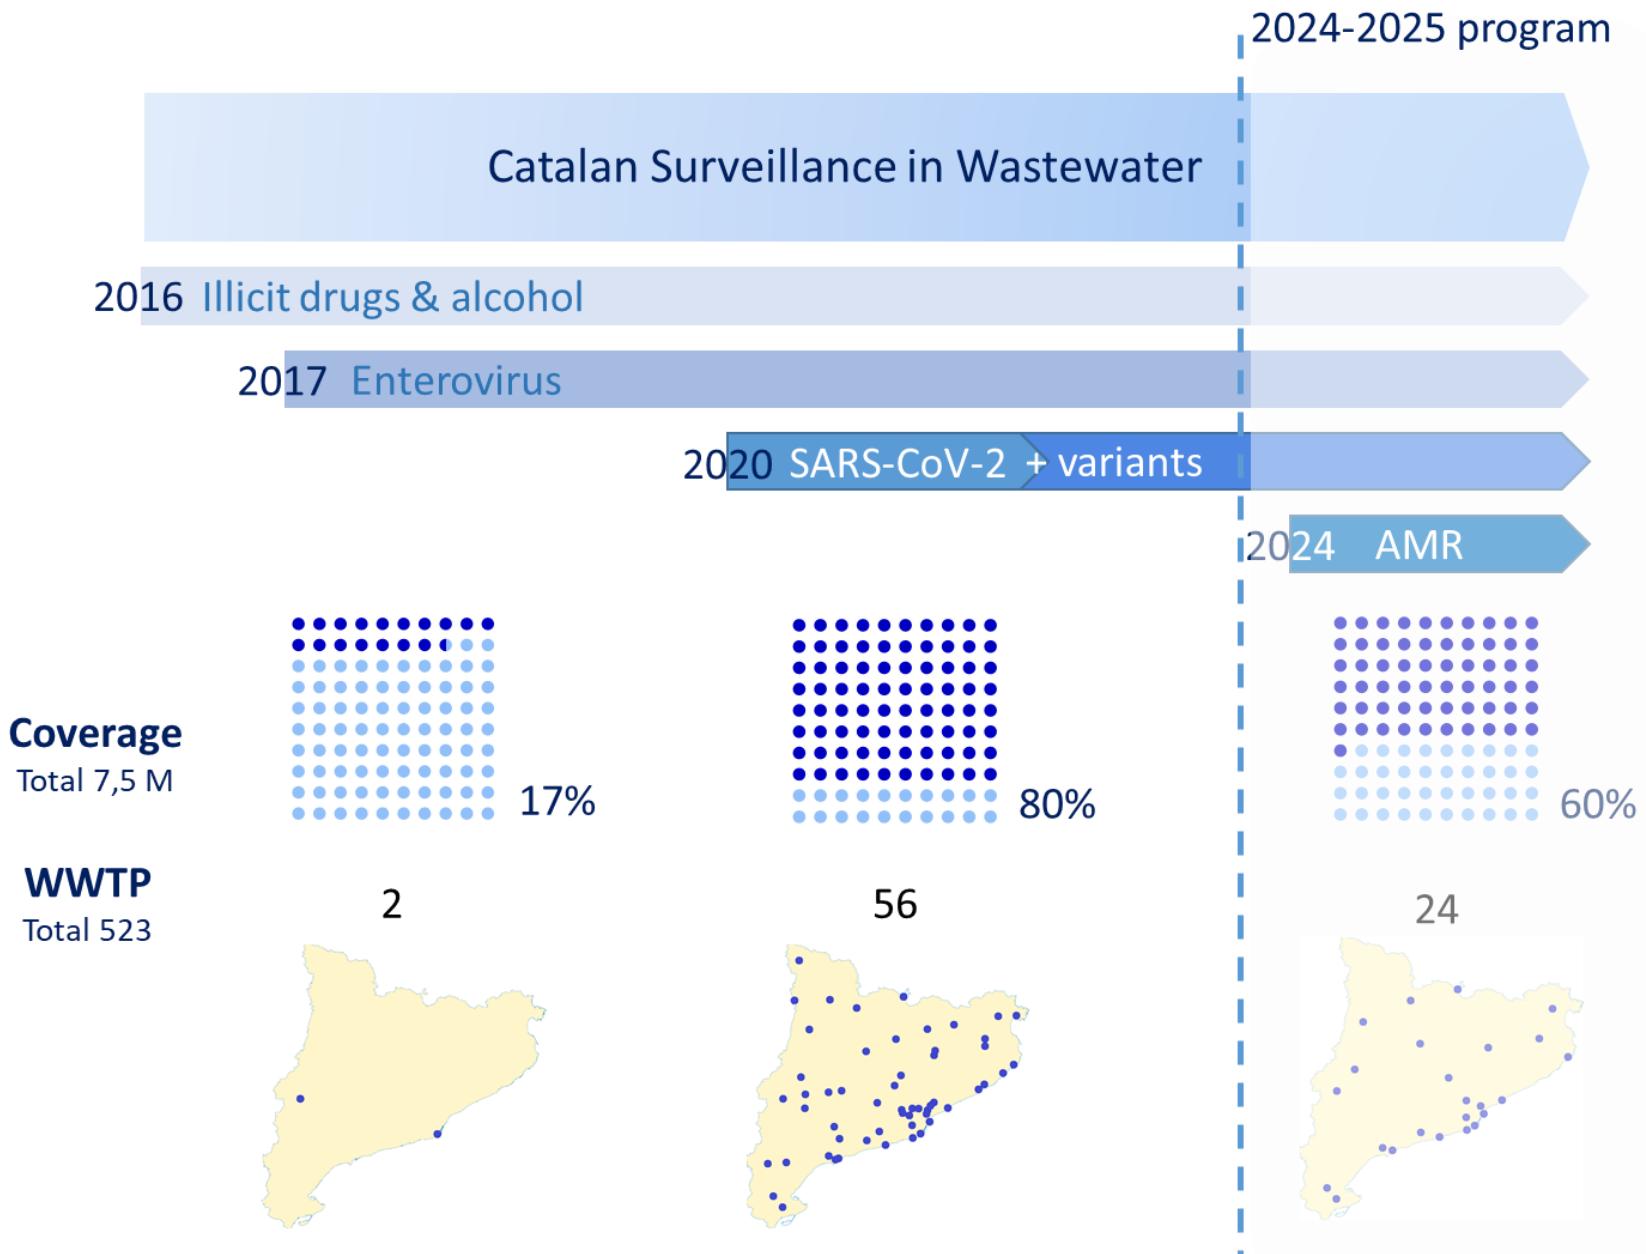

523 WWTP (98% sanitation)

9 Health Regions

Timeline

Illicit Drugs, Alcohol and Sedatives

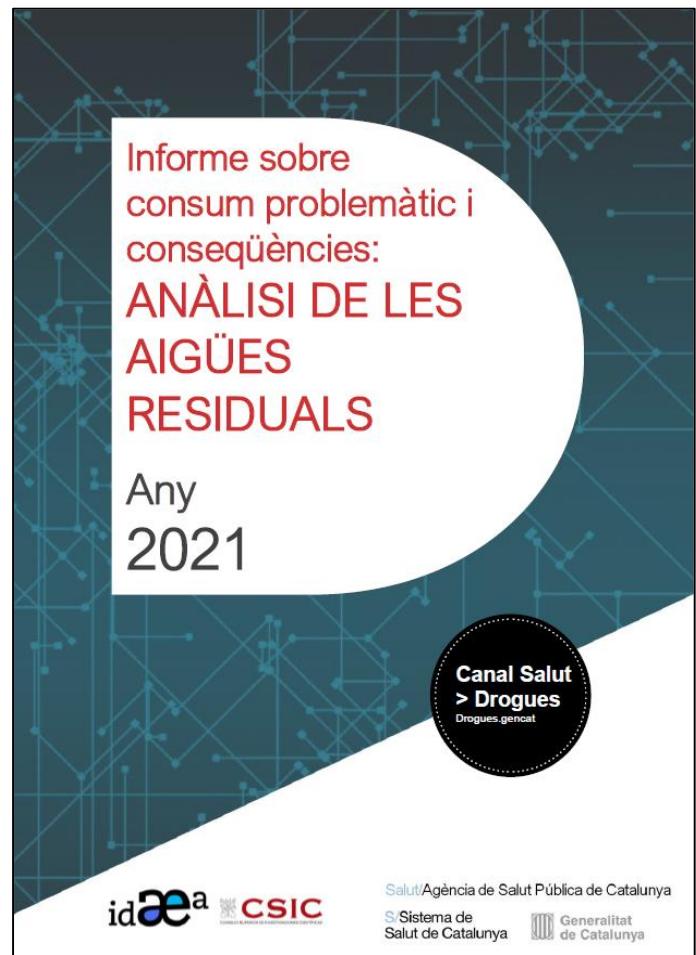

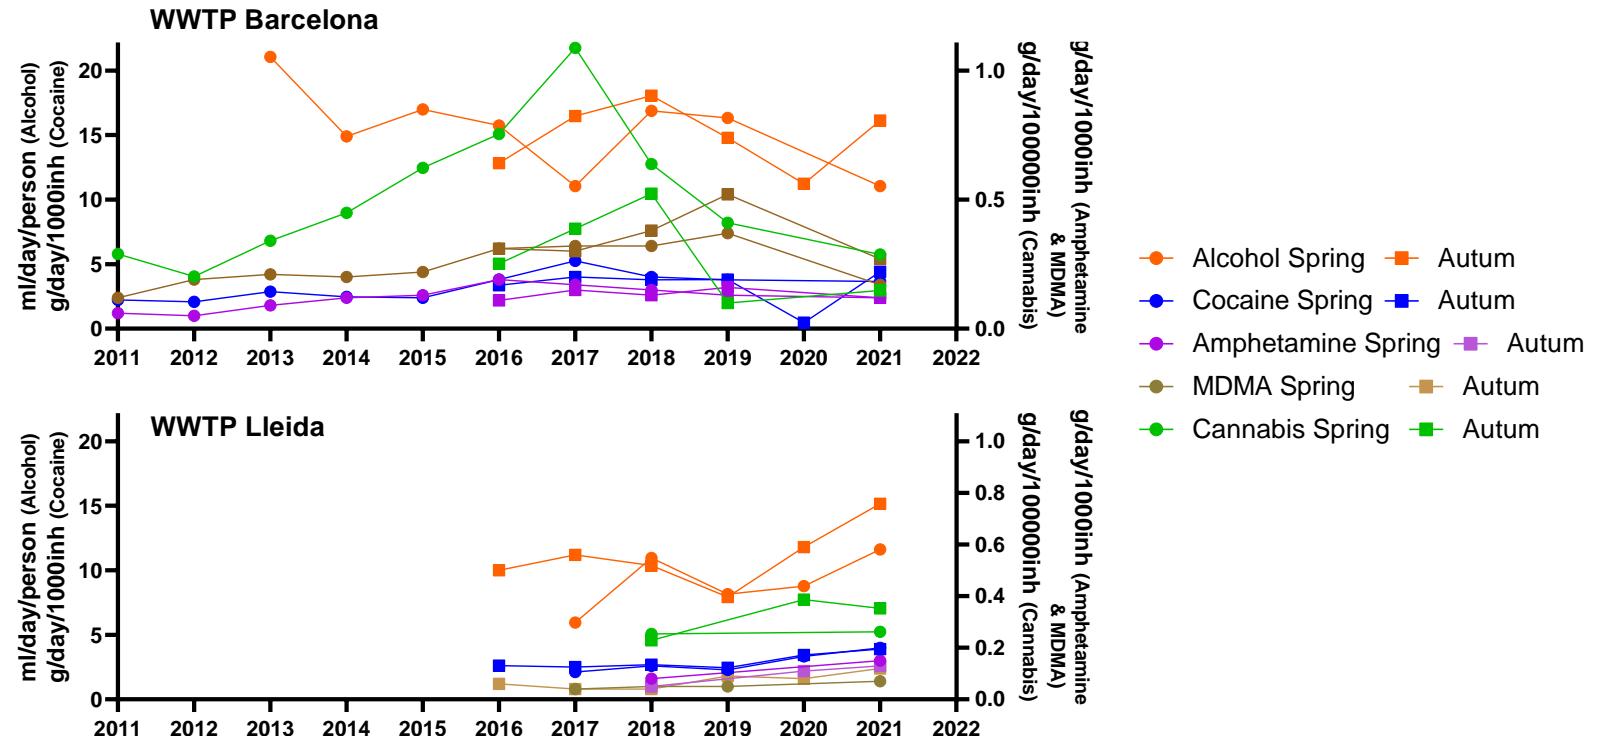

Program started in 2011 (ScoreNetwork), 2016 within ASPCAT

Twice a year sampling (7-day campaing, autum & spring)

2 WWTP : El Prat del Llobregat (1.000.000 inhabitants)

Lleida (300.000 inhabitants)

Results expressed in **consumption per day** (flow, metabolism, population, etc...)

Enterovirus

Program started in may 2017

Monthly sampling

1 WWTP : El Prat del Llobregat (1.000.000 inhabitants)

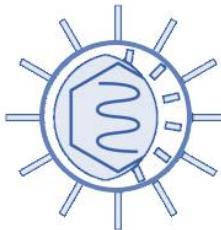

Enterovirus analysis allows us to:

- **Monitor poliovirus:** cVDPV neither WPV have not been detected
- **Detect** the circulation of **neurological strains** (such as A71).

Sewage surveillance integrated into the **Poliomyelitis Eradication Plan**

Objectives

1. Maintain the acute **flaccid paralysis surveillance** system in under 15 years in order to meet the quality requirements established by the WHO
2. Maintain **sewage surveillance** to detect the presence of wild and/or vaccinated polioviruses

Protocol per a la Vigilància de les Paràlisis Flàccides Agudes en menors de 15 anys

Pla d'erradicació de la Poliomielitis

(Enquesta epidemiològica actualitzada juny 2023)

Octubre 2021

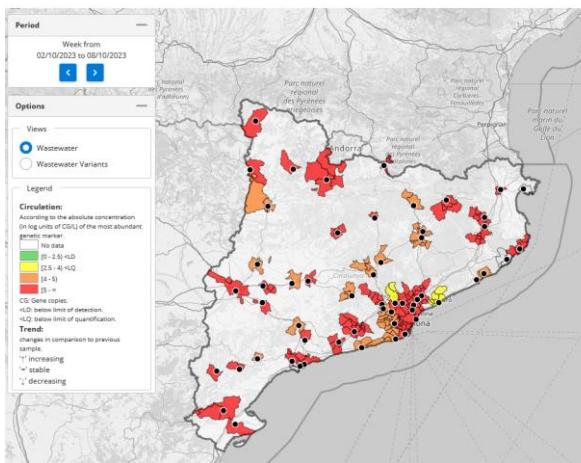

SARS-CoV-2

Viral loads

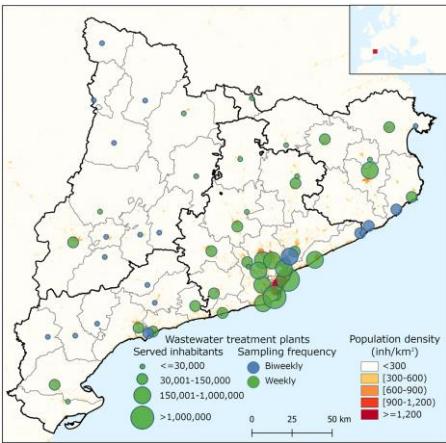

Program started in July 2020

Weekly sampling (36 WWTPs) / fortnightly (18 WWTPs)

56 WWTP covering 6.000.000 inhabitants (80%), ≥ 1 WWTP/county

Analytical methods

Selective culture

- Extended-spectrum betalactamases Enterobacteria (Ent-BLEE)
- Carbapenem-resistant Enterobacteria (Ent-CRE)
- *Acinetobacter baumannii* carbapenem resistant (Acb-CRE)
- Vancomycin resistant enterococci
- *Pseudomonas* sp./ *Pseudomonas aeruginosa*

Metagenomics (resistome & mobilome)

2024-2025 program

Integrated and customized programs

- Different sampling strategies
 - Inlet WWTP: epidemiological surveillance (for all markers)
 - Outlet WWTP: environmental risk assessment (for ARM)
 - Hospitals: emerging health risk (for ARM)
- Different frequencies: monthly, once a year, 7-day campaign
- Different methods: culture, chromatography, PCR, sequencing

We have a plan, but we still have important concerns...

- How often we need to review the surveillance program design?
- What are the bases by which we should evaluate our programs?

Thanks for your attention
